Why this petition matters : *(OUR WATER IS POLLUTED & more...)*

As a concerned citizen, I am deeply troubled by our reliance on the Global Supply Chain (hereafter referred to as; GSC) for basic necessities. This dependence on the GSC not only exposes us to potential contamination, disease and disaster (as witnessed during the COVID-19 outbreak and/or extreme weather events and grid blackouts) but our dependence on the GSC also supports unethical labor practices in countries where modern slavery is prevalent (as Labor rights differ country to country). Our current system fails to protect us during emergencies such as disease outbreaks or extreme weather and blackouts, leaving many vulnerable and without access to essential resources like water, heating, food, clothing, and shelter.

To address this issue, we must require our city to:

1. Research, Develop and Maintain:

A. Self-sufficient Emergency backup systems (1, 2) that can meet citizens' basic needs during major disasters without compromising our local environment or health. These systems should be designed with the capacity to function independently of external aid or resources.

a. Expanded Library: Citizens Forum and Archive

b. Local Co-op's/Unions/Experienced Locals as Lead Advisors

B. Earth First!(4), Sustainable Universal Housing Models(3) co-functioning with/as emergency backup systems

These are true Civil Protections, designs relevant for the modern age (comparison and improvement upon (fire shelter/food backup sys.) to Switzerland's civil protections standards/ bunkers) [open sourced models provided by One Community Global, Open source Ecology (3) and more]

Universal Housing and Transportation is a Necessary Prerequisite for True Voluntary and Informed Consent. Universal Housing will Co-Function with other Emergency Backup Systems (see: evolution of informed consent :<https://archive.org/details/cc-25-master-comp-3/page/n65/mode/1up>)

According to the *United Nations Office for Disaster Risk Reduction (UNDRR)*, cities that invest in disaster risk reduction measures can prevent significant losses both in terms of lives and infrastructure (*UNDRR Report 2019*). Moreover, a study published by the *National Bureau of Economic Research* indicates that increasing local self-sufficiency can reduce vulnerability to global supply chain disruptions (*NBER Working Paper No. 27439*).

By mandating these changes at a city level we are not only safeguarding our community against future crises but also taking an ethical stand against exploitative labor practices abroad.

Please sign this petition urging our city officials to prioritize local self-sufficiency through the development of emergency backup systems.

Thank you for your consideration.
